
Electrical Mechanical Activity Intestine Experimental

rhythmic electrical activity in stomach and intestine of toad - toad gastrointestinal electrical activity 239 I in tri cellular 50 mv 4s fig. 1. spontaneous electrical activity recorded from toad small intestine and stomach. **effects of inhalation anaesthetic agents on the electrical ...** - electrical and mechanical activity were made until least three migrating myo-electrical complexes (mmc) (szurszewski, 1969) had passed the recording sites. the mmc can be conveniently divided into three separate phases; phase i consists of slow waves only, phase ii has intermittent spike potentials superimposed on ber and phase iii consists of a burst of intense electrical activity with ... **the electrical activity of isolated mammalian intestines** - electrical activity of the gut 141 theseparationoftheelectrodes. duringtheactual experiment, the distance between the electrode sutures was liable to ... **postoperative gastrointestinal electrical and mechanical ...** - the jejunal electrical control activity (eca) frequency was very low (4.75 + 5.34 sd cycles per min) and highly irregular immediately postoperatively, but its frequency and regularity improved over the next hour. **gut pacemaker cells: the interstitial cells of cajal (icc)** - electrical and mechanical activities in murine (+/+ and w/wv) small intestine. extracellular extracellular recording of electrical activity was performed from the serosa at the middle of a 1-2 cm long **on the electrical intestine turbulence induced by ...** - the electrical activity of the small intestine in most mammalian species consists of two main components [64]: the slow waves or electrical control activity (eca) and **the effect of 2o on electromechanical activity of the ileum ...** - electrical and mechanical activity of the longitudinal layer from the guinea-pig ileum by simultaneous recording of membrane potential and mechanical tension using single sucrose-gap technique. **effect of some i.v. anaesthetic agents on canine ...** - mechanical activity of the intestine. these have advanced considerably in recent years (bass and wiley, 1965, 1972; evans et al., 1978) and have increased the detailed knowledge of normal fasting activity (szurszewski, 1969). in addition, the methods of analysis (carlson, bedi and code, 1972) have been improved. we have examined the effect of anaesthetic agents on the electrical and mechanical ... **modelling of thermally induced electrical instabilities in ...** - modelling of thermally induced electrical instabilities in intestine using consol multiphysics a. gizzi, c. cherubini, s. migliori and s. filippi **ionic mechanisms of intestinal electrical control activity** - ionic mechanisms of intestinal electrical control activity taher y. el-sharkawy and edwin e. daniel ... control potentials of small intestine; smooth muscle pacemaker activity; smooth muscle electrophysiology; ionic basis of smooth muscle rhythmic activity the electrophysiological basis of the myogenic control of the motor function of the small intestine in most species including man is the ... **electrical activity of the intestine of mice with ...** - electrical activity of the intestine of mice with hereditary megacolon and absence of enteric ganglion cells j. d. wood, ph d mice with a recessive gene which reduces the number of ganglion cells of the large intestine and produces megacolon similar to hirschsprung's disease were studied. electrical activity of the small bowel consisted of electrical slow waves and action potentials and showed ... **modification of the electrical activity of the human ...** - modification of the electrical activity of the human intestine after serotonin and caerulein g. labo, md, l. barbara, md, g.a. lanfranchi, md, m. bortolotti, md and m. miglioli, md the effects of serotonin and caerulein on the electrical activity of the human small intestine has been investigated. in a dose of 2.5 mg intra- venously, serotonin induces a strong motor response, with an increase ... **intestinal effects of the products of lipid digestion on ...** - trum whereas the small intestine (duodenum and first part of jejunum or ileum) was perfused with various solutions including calcium propionate, tributyrin, sodium caprylate, potassium oleate, mix- tures containing linoleic acid, monolein, triolein, mixture of triglycerides, and glycerol. long-chain lipids and glycerol both induced a decrease in the rate of basal antral activity. this effect ... **on exploring the basis for slow potential oscillations in ...** - taneous, rhythmic electrical signals occur in both small intestine and stomach even in the absence of visible mechanical activity. viewed with extracellular recording
